

LED transformer | connector 6-hole | remote control | parallel | 18 watt

Product Images

Short Description

This Hamulight LED transformer is suitable for the porch AB sets with 6 LED spotlights. The 6-hole parallel connector is fixed to the transformer.

Description

Do you need a transformer for your porch AB set and does your set have 6 LED spots? Then this is the transformer you must have! This transformer ensures that no 230 Volt, but a safe low voltage of 3,6 Volt runs through the beams of your porch. The parallel connector ensures that if a spotlight fails, only that spotlight fails and the rest of the spotlights continue to burn as normal.

Please note: the connector of this transformer must be filled with at least 3 LED spots.
