

Cree LED spike light Lagos | warm white | 10 watt | tiltable | 24 volts

Product Images

Short Description

The Cree LED spike light Lagos consumes only 10 watts and is ideal for illuminating objects, trees and bushes from 7 to 10 metres in height. You can also light up a façade up to 10 metres high with the Lagos lamp. This spotlight works on 24 volts and is, therefore, part of our 24-volt garden lighting system.

Description

Are you going to light a large shrub, tree or object 7, 8, 9 or 10 metres high? If so, the Lagos spike light is an excellent choice. With its low-energy consumption of 10 watts and warm whitebeam (2700k), the Lagos Spotlight brings atmosphere to your garden. On the underside of the spotlight is a sharp pin. This sharp pin can easily be inserted into the ground and thus the spot can be (re)placed. The spotlight is tiltable and you can therefore determine how high the beam of light shines. The Lagos spotlight is powder-coated and has an IP value of 65 (IP65). This ensures that the spotlight is completely weather-resistant.

The Lagos LED spotlight is part of our 24-volt garden lighting system. The spot has a cable of 1 metre with a 24-volt connector at the end. With this, you can easily connect multiple Lagos light bulbs or with another 24-volt garden lighting. So you can light up your whole garden with different 24-volt garden lighting which provides a nice coherence.

24-volt garden lights work on a 24-volt transformer. You need this transformer for the functioning of the 24-volt system. This also applies to the Lagos spotlight. You can choose from 2 different transformers. The LED transformer converts the incoming 230-volt current to 24-volt. The Astro LED transformer does the same, but with this transformer, you can also program the lights in 5 different positions. With these settings, you can operate the lights (or have them operated). You, therefore, need to order one of these transformers separately from our webshop for the operation of the Lagos spotlight. You can connect up to 80 watts of 24-volt garden lighting to both transformers!

Using 24-volt extension cords and 24-volt cable connectors, it is possible to connect several Lagos spotlights or other 24-volt garden lights with each other. These accessories are available on our webshop.

Tip: do not forget to add a 24 volt LED transformer separately to your shopping basket

The Cree LED floodlight Lagos has a 5-year warranty. Read more product information in the product specifications and also watch the product movie. Do you have a question? Ask our LED specialists.

Additional Information

Article number	L2187
EAN code	7435124544506
Brand	Hamulight
Suitable for	Outside
Light color	Warm white (2700K)
Input voltage	24V DC
LED chip	Cree
Consumption	10 watt
Dimmable	No
Lumen per LED (including lens)	912 lm
Color Rendering Index (CRI)	>82
Light angle	23 Degrees
Diameter	75 mm
Width	130 mm
Height	340 mm
Cabling per LED	100 cm
Transformer required?	Yes
Material	Aluminium
IP value	IP65
Quality mark	CE, Rohs
Guarantee	5 years
Energy label old	A++
Energy label new	F
