## Cree LED recessed spotlight veranda Soria square white los | warm white | 3 watt

### Product Images

---

## Short Description

---

With this separate spot from the Soria series you can create your own porch set. This spotlight can also serve as an addition to your current Soria porch set.

## Description

---

Would you like to expand your current Soria porch set by Hamulight? Then this is the spotlight you need. Check whether you can expand the set at all. You can do this by looking at the connector (attached to the transformer). Are there any free connections? Then it is possible to fill the free connections with spots.

Please note: if there is a jumper in a connection, this is also regarded as a free connection and can be replaced by a separate spotlight.

Would you like to create you own set with this spotlight? Then choose the number of spots and add the correct transformer and receiver (if required) to your shopping basket. Not sure which transformer and/or receiver you need? Please feel free to contact us and we will advise you.

## Additional Information

---
